01 // TOURNAMENT FORMAT

This tournament will be split into 2 parts, the first part is a group round robin stage with 5 people in each group A B C AND D, 5 players will be randomly drawn into a group, which will be done live on twitch, and from that group 2 people will progress to the knockout stage and the remaining 3 people from each group will be knocked out. each person in a group will play everyone else drawn into there group once in a best of 5 match up. each player will play 4 separate b05 matches each in the group stage and the group winner and runner up with the highest amount of points acquired will advance to the next round. you acquire points by winning games in your matches. for example if you win 3 - 0 you will win 3 points from that match also if you win 3 - 2 you will also win 3 points from that match up. alternatively should you lose a b05 match up 0 - 3 you would get 0 points but if you took 2 games in a 3 - 2 lose you would still get 2 points based on the games you won in the match up. the top 2 players in the group stage with the most points at the end after all 4 matches have been played by everyone will advance to the knockout stage as group winner and group runner up respectively. if 2 players have the same amount of points and are tied in 1st and 2nd/ 2nd and 3rd then the player who won the match up between those 2 players will advance on head to head

Each match up will start with a coin toss and the winning player gets to choose the first map and the 2nd player gets to pick the first spawn choice. after the first match rotate map picker/spawn picker until the match up is completed. this will be the same format for all knockout matches as well.
